

ATCO Gas Australia installs the gas pipeline to Yanchep.

How to get a **free natural gas** connection to your **new home** at **Yanchep Golf Estate.***

* For a standard connection of up to 20 metres of service line, including meter box, where the property has street frontage and is on line of main. Other conditions may apply. See the Connection Process Handbook available at www.atcogas.com.au for full details.

Fast, clean, efficient, hot water, cooking and heating for your home is coming to Yanchep, with natural gas soon to be available to residents of the new Peet development, Yanchep Golf Estate.

New pipes are already in your street and are undergoing the final stages of testing, so a standard gas service and meter can be installed to your home at no additional cost to you. All you need to do is:

1. Choose your lot at Yanchep Golf Estate.
2. Talk to your builder about using natural gas for hot water, cooking in your kitchen and alfresco and home heating.
3. Call a gas retailer who will set up an account and arrange for us to connect your service and meter to your home at no cost*.

ATCO Gas
 AUSTRALIA

ATCO Gas Australia. We listen. We deliver.
 It's our way of building a better network for all Western Australians.

The benefits of natural gas

Choosing natural gas for cooking, heating and hot water is a smart choice. Here's why:

- **Affordable**

Natural gas is around 23% cheaper than LPG and 40% cheaper than electricity, and could save you up to several hundred dollars a year.¹

- **Clean**

Natural gas emits less carbon dioxide per unit than any other fossil fuel, so it's better for the environment.

- **Reliable**

Natural gas is supplied through pipes in the ground, so it's less likely to be affected by storms or extreme weather, so you can depend on a reliable supply.

- **Controllable**

Natural gas is fast and immediate, providing total control when cooking, so you never need to wait for elements to heat up or cool down.

- **Comfort without compromise**

Flued natural gas heaters offer a comfortable source of heating that provides instant heat without draughts, dust or condensation. This means that it's also suitable for families with health conditions such as asthma.

¹ Based on annual residential usage of 15.8GJ including standing charges for Natural Gas & LPG. Electricity prices from Synergy Website, LPG prices from Elgas & Kleenheat & Natural Gas prices from Alinta Energy, all as at 03.09.12

How to get the most out of natural gas

Natural gas is ideal for cooking, heating, barbecues and hot water generation. If you're building in Yanchep Golf Estate, work with your builder on how best to integrate natural gas in your home.

This may include connections for hot water, outlets in the kitchen and alfresco for stoves, ovens and barbecues, as well as in living areas for heating.

Remember, once you have gas connected to your property it's easy to extend the range of appliances that can use it.

If you're currently using bottled LPG, it may be possible to convert your home to natural gas without having to buy new appliances. We recommend you call a qualified gas fitter who can talk to you about converting your existing appliances and connections.

Who is ATCO Gas Australia?

ATCO Gas Australia is an organisation of highly skilled and experienced people who are committed to the safe and reliable delivery of natural gas to Western Australians.

As a gas distribution company, ATCO Gas Australia builds, owns and maintains the underground network of pipelines that bring natural gas to more than 665,000 customers across Western Australia.

As part of the Yanchep Golf Estate development, we have extended our network to Yanchep to enable you to connect your home and enjoy the many benefits of natural gas.

Once you've talked to a retailer and had the connection to your home established, ATCO Gas Australia will maintain the supply, and ensure that its network is up to and including the meter and continues to provide you with gas to the home.
